Component Library

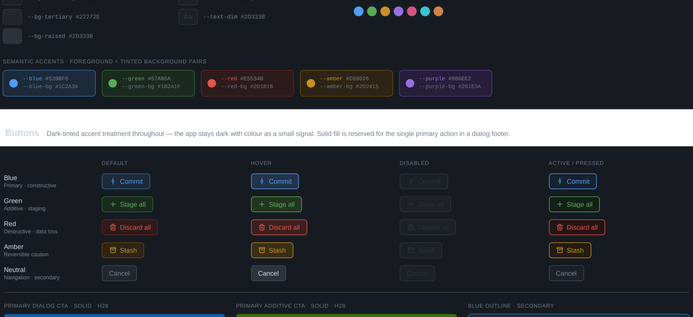
The single visual reference for the Trunk Git client — every reusable element, in all its states, with measurements and `--token` annotations for implementation.

DARK THEME REFERENCE

v1.0 · 14 component groups · dark.css

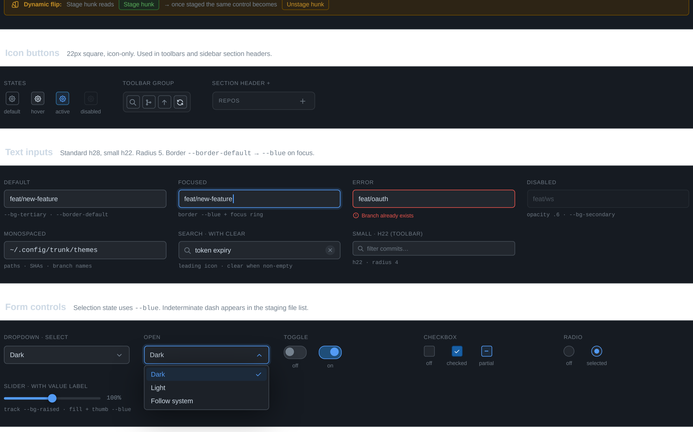
00 Palette

Every component draws only from these tokens. No arbitrary colours.



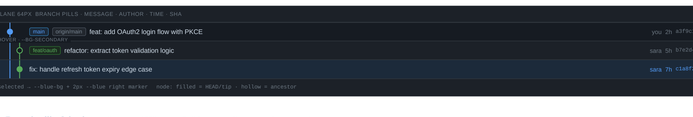
01 Buttons

Dark-tinted accent treatment throughout — the app stays dark with colour as a small signal. Solid fill is reserved for the single primary action in a dialog footer.



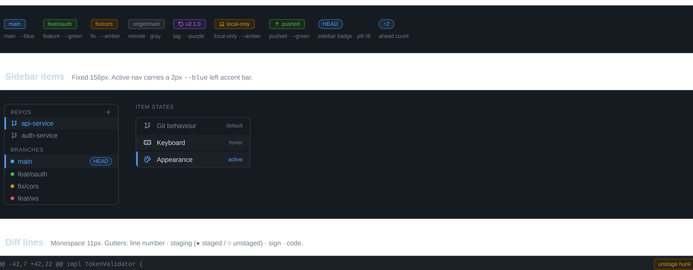
02 Icon buttons

22px square, icon-only. Used in toolbars and sidebar section headers.



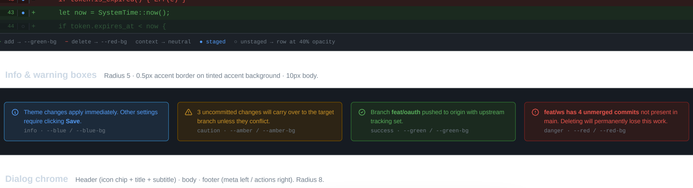
03 Text inputs

Standard h28, small h22. Radius 5. Border `--border-default` → `--blue` on focus.



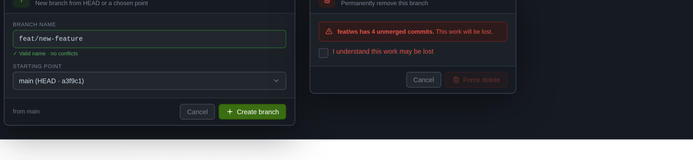
04 Form controls

Selection state uses `--blue`. Indeterminate dash appears in the staging file list.



05 Commit row

The atomic unit of the graph canvas. Height 30px · lane column 64px · sits on `--bg-primary`.

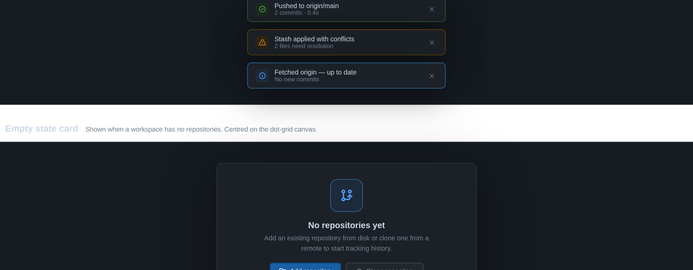


06 Branch pills & badges

9px · weight 500 · radius 3 · 0.5px border. Colour maps to ref semantics.

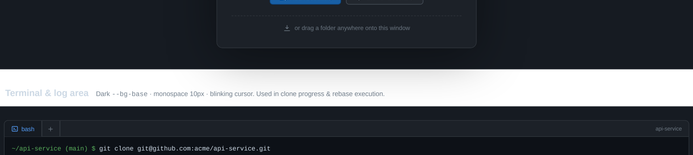
07 Sidebar items

Fixed 156px. Active nav carries a 2px `--blue` left accent bar.



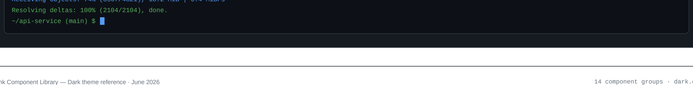
08 Diff lines

Monospace 11px. Gutters: line number · staging (● staged / ○ unstaged) · sign · code.



09 Info & warning boxes

Radius 5 · 0.5px accent border on tinted accent background · 10px body.



10 Dialog chrome

Header (icon chip + title + subtitle) · body · footer (meta left / actions right). Radius 8.

11 Context menu

Item · hover · danger · separator. Floats on `--bg-secondary` with a drop shadow.

12 Toasts

Transient. Appear bottom-centre over the canvas, then auto-dismiss.

13 Empty state card

Shown when a workspace has no repositories. Centred on the dot-grid canvas.

14 Terminal & log area

Dark `--bg-base` · monospace 10px · blinking cursor. Used in clone progress & rebase execution.
